

Water District No. 7 Project Update

The Town has received a number of inquiries regarding the status of the Water District No. 7 project and, in the interest of keeping everyone informed, would like to provide the following update.

The Notice of Award has been issued to North Country Contractors for construction of the new water system. We are currently working with our state and federal funding agencies to complete the administrative requirements necessary for the release of grant funds and final contractor approvals. While much of this work takes place behind the scenes, it is an essential step before construction can begin.

Our next major milestone is the pre-construction meeting, which we are hopeful will take place later this month.

In the meantime, Barton & Loguidice is preparing door hangers for property owners they have not yet met with regarding service laterals, underground utilities, and other site-specific information. **If you do not receive a door hanger** but believe you should discuss your property with the engineers, please contact Barton & Loguidice to ensure they have your information. (Kyle Nichols 315-701-9810). You are also encouraged to contact the Town Office 315-654-3795 for general information.

We understand there is some uncertainty as the project moves through these final administrative stages, and we appreciate your patience. The Town Board is committed to providing updates as new information becomes available.

Because many property owners are seasonal residents, we encourage everyone to monitor the Town website for project updates or coordinate with neighbors who can help share information. We also maintain an email distribution list of approximately 30 residents throughout the district who have volunteered to receive project updates and pass them along within their neighborhoods.

Thank you for your continued patience and support. We look forward to sharing more progress as we continue moving this important project toward construction.

Christine Stark (Town Supervisor)
